Contact: byjuaditya@gmail.com | Website: <https://adityabyju.vercel.app> | GitHub: [TheWiseGhost](#)

TECHNICAL QUALIFICATIONS/EXPERIENCE

- Proficient in Javascript, Typescript, React, NextJS, Python, Tailwind, Stripe, and MongoDB.
- Proficient in GitHub, Cursor, Windows OS, Linux (Ubuntu), Vercel, Render, Pydantic, and Logfire.

EDUCATION

Georgia Institute of Technology
Bachelor's in Computer Science

Atlanta, GA | Expected May 2028

Stanford | Online
CS229 by Andrew Ng, CS230 by Andrew Ng, CS25

Remote | Dec 2023 - May 2025

WORK EXPERIENCE

Software Engineering Intern | Bild AI

Sept 2025 - Present

- Y Combinator-Backed Startup, \$3+ Million in funding
- Developing a blueprint-understanding AI for the construction industry to estimate material costs quickly, flag discrepancies, and validate that plans meet relevant standards and regulations
- Created significant codebase changes (>2,000 lines); merged features into production app; worked directly w/ founders and clients. Iterated on the project based on user feedback gained through these client meetings
- Using Typescript, NextJS, GitHub, Python, Gemini API, Logfire, Pydantic, AWS (S3)

Math and Reading Tutor | Kumon

May 2023 - Oct 2023

- Used knowledge of the Kumon program after graduating from both Math and Reading to come back to Kumon as a tutor and assist students in completing and understanding material.
- Was a calculus tutor teaching students the equivalent of AP Calculus BC work as just a sophomore in high school

Founder | NoteSlide & Limeblock

Jun 2024 - Sept 2025

- Learned skills beyond just software, like marketing, sales, and management
- Grew from passion projects into startups that achieved significant impact (see below)

PUBLISHED PROJECTS

NoteSlide | <https://noteslide.vercel.app/>

Jun 2024 - Feb 2025

- Profitable note-sharing platform (essentially YouTube but with notes) that I scaled to a team of 14 and over 50,000 users before exiting for \$15,000.
- Used SEO, marketing, user feedback, and sponsorships to grow the platform.
- React, Framer Motion, Tailwind, Python (Django), AWS (S3), Stripe

Limeblock | <https://limeblock.io/>

Mar 2025 - Sept 2025

- B2B startup that makes integrating AI features into any web app easy. It became profitable in less than 1 month with 15 client companies and was accepted into Founder's Inc. Spent 6 weeks in the summer of 2025 in San Francisco growing the startup in a sprint.
- NextJS, Framer Motion, Tailwind, Python (Django), Deepseek, Stripe, Langchain

Other Projects | <https://adityabyju.vercel.app/projects>

Feb 2024 - Present

- Multiple tools I created that had a small impact, but didn't fully flesh out into startups
- Learned many skills on how to make projects, both technically and for the market, through these tools.
- HTML, CSS, NextJS, React, Framer Motion, Tailwind, Python (Django), AWS (S3), Stripe
